Company/Department	
Location	Gush-Dan
Reports to	
Type of position	<input checked="" type="checkbox"/> Full-time <input type="checkbox"/> Part-time <input type="checkbox"/> Contractor <input type="checkbox"/> Intern / Student
JOB DESCRIPTION	

WORK EXPERIENCE REQUIREMENTS

- The product specialist will join the Product Management team responsible for the authentication product.
- He/she will work closely with other product managers and with customer-facing teams to collect market inputs, perform competitive analysis, and understand customer needs and other product requirements.
- He/she will then consolidate these requirements into detailed product specifications, closely interacting with the engineering group to support feature design, implementation, and documentation.
- The product specialist will serve as a subject matter expert, closely interacting with customers and customer-facing teams as part of features and releases roll-out, training, pre-sale and post-sale inquiries.

EDUCATION REQUIREMENTS

Requirements

- A successful product specialist will possess the following capabilities:
- In-depth knowledge and experience of software development
- Experience in an internet application environment
- Experience in a mobile application environment – an advantage
- Excellent attention to details, and excellent analytical skills
- Excellent English – both verbal and writing

- Effective communication and presentation skills
- Strong inter-personal skills
- Ability to work in a demanding, fast-paced and rapidly evolving environment – as an individual and as part of a team
- Experience working with international customers – an advantage
- Experience in creating detailed product specifications – an advantage
- Bachelor degree in computer science or mathematics (or equivalent)
